Professional Summary

built and maintained backend services in Go across multiple projects,
using clean architecture, database optimization, and concurrent processing techniques,
to ensure scalability, maintainability, and performance

Work Experience

SmartAdmin.uz – CRM Admin Panel (Oct 2024 – Apr 2025)

• Developed CRM system for inventory, sales, cash flow, debts, and purchases.

• Led multi-company, multi-branch backend architecture.

• Optimized bulk updates with goroutines & waitgroups for 2-3x faster processing.

• Implemented services using Go, PostgreSQL, Redis, Docker, and Kafka.

ManageApp.uz – Social Media & Task Management (Feb 2025 – Present)

• Built platform for social media post scheduling & task management.

• Designed ERD & clean codebase; integrated Oauth, Instagram & social APIs.

• Led team of 2 backend & 1 frontend; delivered 3 major releases.

Udevs – B-Trader (May 2025 – Present)

• Developed 4 Knative microservices; implemented Redis caching for rapid data exchange.

• Reduced API latency significantly through optimized inter-service communication.

Education

• Najot Talim (2023–2024): Backend Developer program (Python, C, advanced Go).

• Led projects: MiniTwitter & Turk-SocialMedia (GitHub).

Skills & Technologies

• Languages: Go, Python, C
• Frameworks: Gin, Gorilla
• Databases: PostgreSQL, MySQL, MongoDB, Redis
• Containers: Docker, Docker Compose
• Tools: Swagger, JWT, Casbin
• Message Brokers: Kafka, RabbitMQ

Languages

• English (B1)

• Russian (B2)

• Uzbek (Native)
